

Thank you for purchasing the levelbedded Dice Tower. During the assembly of your dice tower please only use PVA glue as this will provide the cleanest and strongest finish for your tower. Use a brush or tooth pick to apply a small amount of glue to all the joints before assembling as shown below.

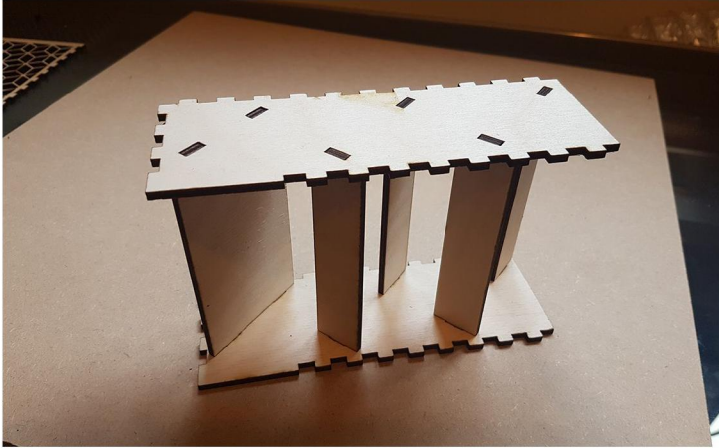

1) Check to see if you have all the panels for the tower.

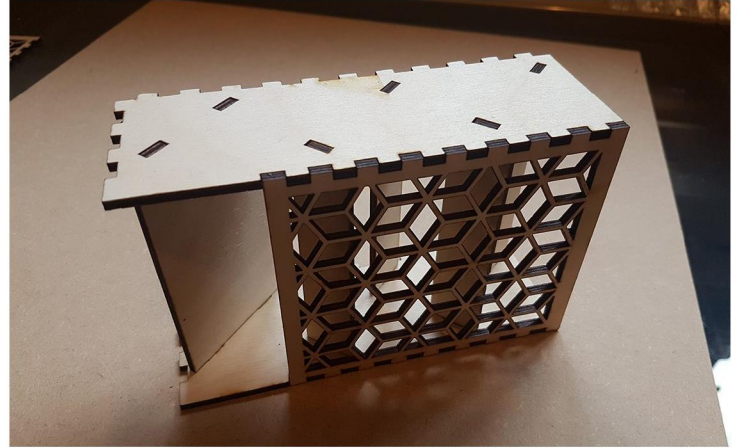

2) Lay down one of the side panels and glue in angled panels as shown below

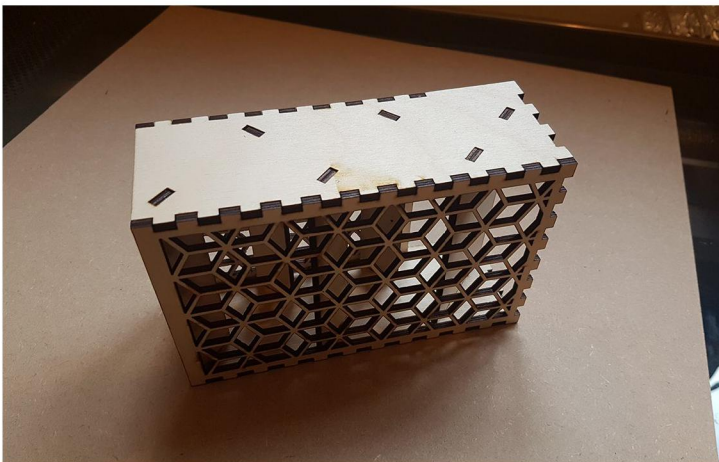

3) Glue on second side panel as shown below.

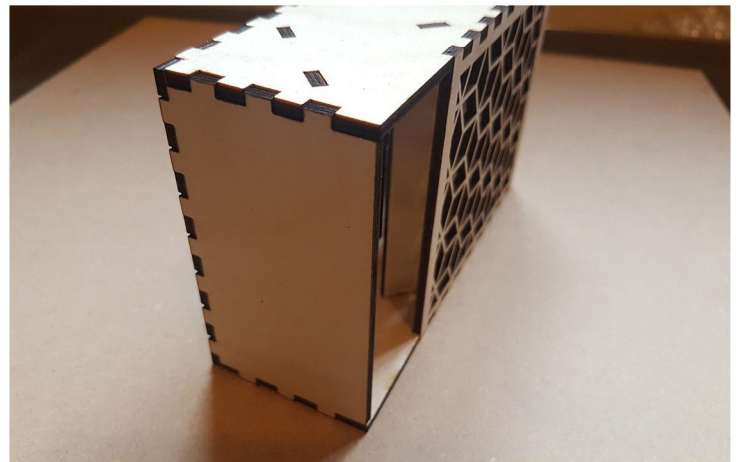

4) Glue on front panel, ensure all the teeth match up.

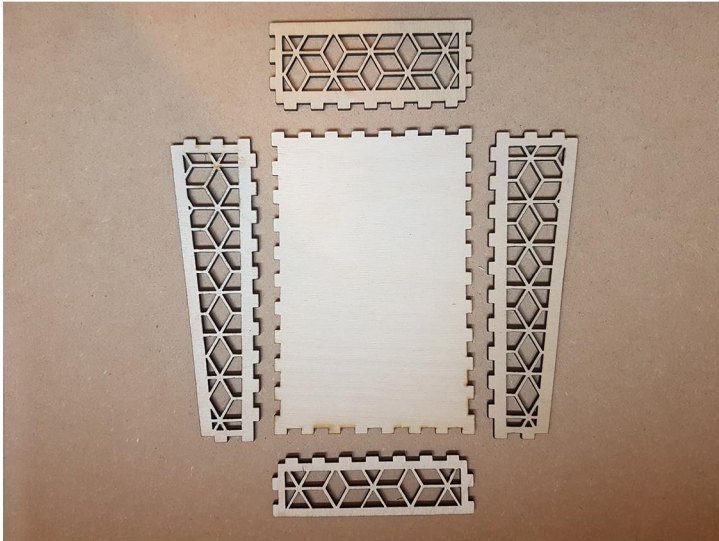

5) Glue on back panel as shown below.

6) Glue on base panel. Elastic bands can be used to hold the tower in place while drying.

7) Check to see if you have all the pannels for the tray.

8) Glue on both side panels as shown below.

9) Glue on the front panel as shown below, making sure not to dislodge the sides.

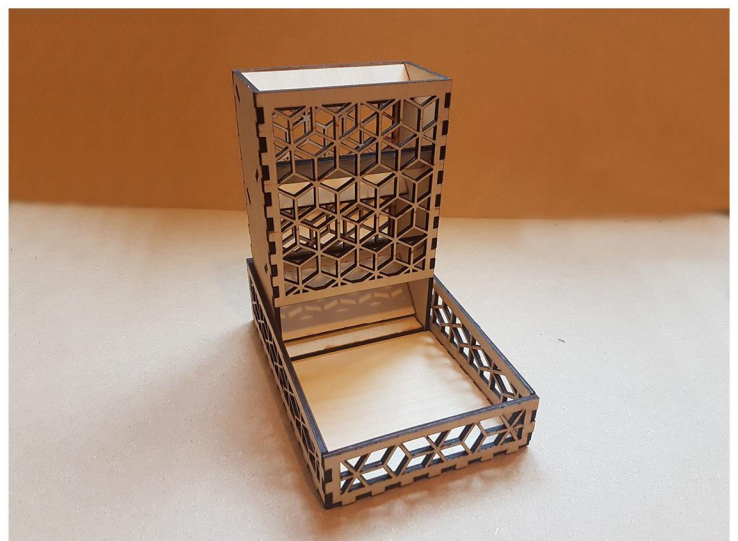

10) Glue on the back panel as shown below, making sure not to dislodge the sides.

11) Once both parts are fully dry check the fit.

12) Your tower is finished! Have fun rolling and we would love to hear your feedback.
