

Thank you for purchasing the Level Bedded Cannon Extras. We recommend using a standard PVA wood glue on this product to ensure a good bond to the wood. Other useful tools to help you assemble your cannons would be a toothpick or brush to help apply the PVA with and masking tape to help hold it in place whilst it glues up.

Please note, please are small parts and are not suitable for young children. If you are interested in any more tabletop kits, find us at [etsy.com/uk/shop/LevelBedded](https://www.etsy.com/uk/shop/LevelBedded)

1) Make sure you have all of the above parts and a pot of PVA glue to assembly.

2) Glue in the panels to the top rim starting with panel A as shown above. Wait for these parts to fully before gluing on the base panel.

3) While waiting for the top panel to dry, glue in the F panel onto the base panel as shown above.

4) Then glue on the rudder panel G as shown above. Wait until these panels are dry before gluing the two halves.

5) Glue the two halves together as shown above.

6) Finally step is to add the oars and enjoy.
