

Thank you for purchasing the Level Bedded mini paint rack. We recommend using a standard PVA wood glue on this product to ensure a good bond to the wood. Other useful tools to help you assemble your paint rack would be a toothpick or brush to help apply the PVA with and masking tape to help hold it in place whilst it glues up

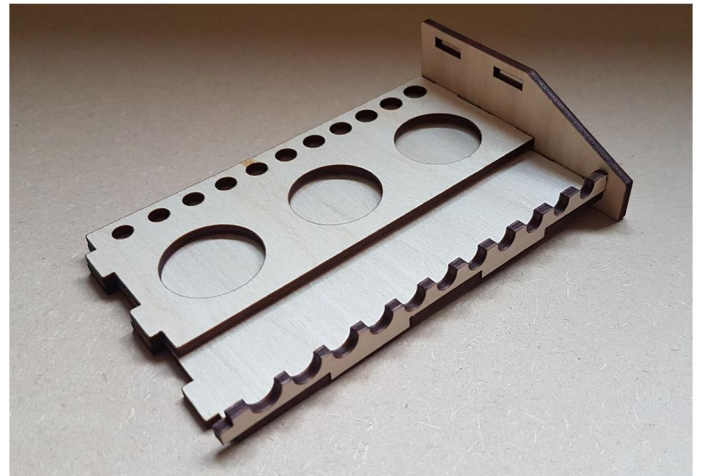

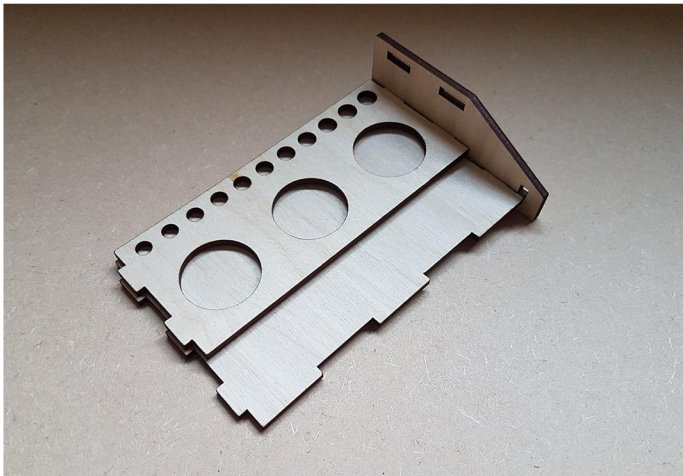

Your pack should include the following parts:
1 Base panel, 1 bottom paint panel, 1 front brush holder strip, 2 side panels and 1 top paint panel as shown below

1) Use a brush or tooth pick to apply a small amount of PVA to the base panel and attach it to one of the side panels as show below

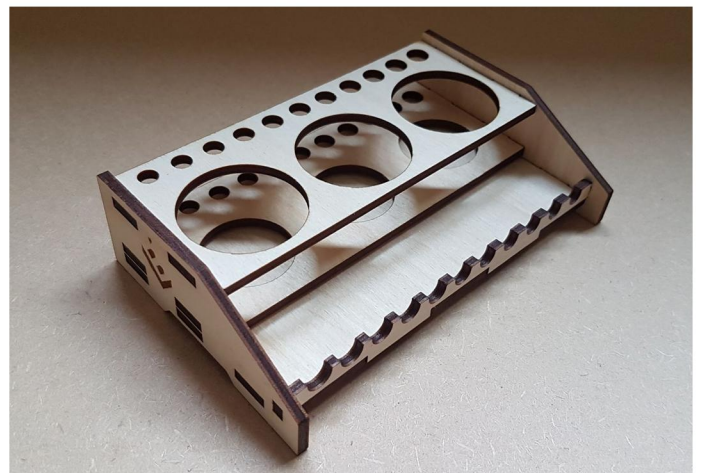

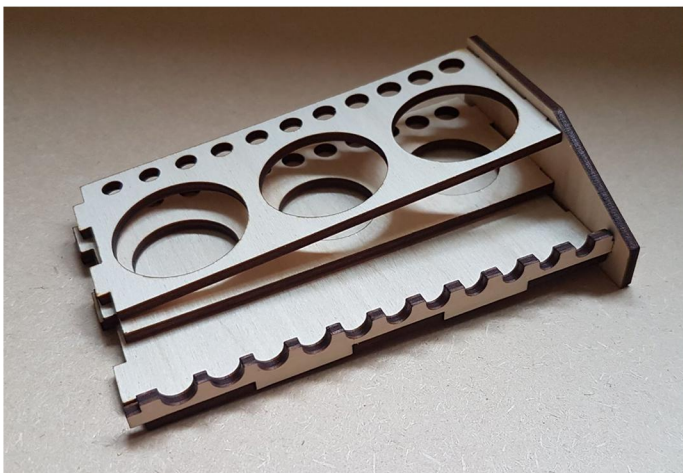

2) Apply glue and attach small holed paint holder panel to the side panel

3) Apply glue and attach the small brush holder panel as shown below

4) Apply glue to the large holed paint holder panel and attach it to the side panel as shown below, ensure the large and small holdes line up along the back of the two paint holder panels

5) Lastly, attach the second side panel, let it dry and you are ready to enjoy your new paint rack

Paint Rack - Parts List

One of each part is included with this kit. (Not actual size)
